Shot Cartridges,

MANUFACTURED BY THE

American Metallic Cartridge Co.

SOUTH COVENTRY, CONN.,

U. S. A.

A. M. C.

SOUTH COVENTRY, CONN.,

January, 1889.

**W**E MANUFACTURE high grade cartridges with new and improved machinery, and no expense has been spared to make them perfect in every respect.

The bullets are all swaged to a uniform size and density, and so shaped as to give the best results in shooting.

We recommend our Rim Fire Cartridges for target shooting, and especially our new 32 and 38 calibre central fire *round ball* target cartridges, for obtaining the greatest accuracy at the usual range distance.

The Central Fire Cartridges are all made with solid heads, with flanges gauged and trimmed to exact size, which is essential when used in any automatic extracting revolver.

The demand for our Shot Cartridges, made under our patents, has been such that we were obliged to add new sizes to our continually increasing list. We are also prepared to furnish the loaded shot cases for those desiring to reload their shells.

**The American Metallic Cartridge Co.**

For 44 Winchester, 44 X. L., 40-82 Winchester, 45 Colt's Army, 44 Evans, N. M.	6 60

### DISCOUNT.

These cartridges can be reloaded with any regular reloading tool. The Ideal Manufacturing Company making their tool No. 7 for the X. L. sizes.

### LOADED SHOT CASES.

The shot is enclosed in a *thick paper case*, packed closely, and when set in the shell has the appearance of being a bullet. This case is *lubricated on the outside*. When shot, the paper case is forced through the rifling of the Weapon, and *thoroughly cleans and oils the barrel*, and at the same time acts as a *shot concentrator*. Upon reaching the muzzle of the Rifle or Pistol, the case bursts and the shot are scattered.

Packed as it is, the shot cannot possibly in any way injure the rifling of a barrel. We can furnish 22 calibre, Rim Fire, loaded with No. 11 Chilled Shot or Dust Shot, and the 38 X. L., and 44 X. L., loaded with Dust Shot if so ordered. This seems to be the most suitable size for taxidermists.
