Waterproof Black Paper Shot Shells.

Made in three qualities, namely, First, Star and Climax, all of which are Waterproof.

The United States Black Waterproof Paper Shot Shells are intended to overcome a disadvantage which all other shells are subjected to when used in damp weather. They are so completely waterproof that no water can penetrate into the powder even when they are entirely submerged.

These Shells are adapted to the No. 2 Lowell, Wesson, or Winchester Primers, and the First Quality may be reloaded from four to ten times.

The above cut represents a U. S. Paper Shell cut open, to show the form of the head. The paper is firmly compressed into the flange around the head, so that the head will not come off in firing.

Solid Head Brass Shot Shells.

U. S. CARTRIDGE COMPANY,

Brass Shot Shells.

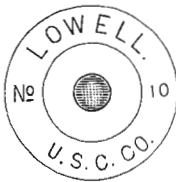

Use No. 2 U. S. Primers.

Packed in Boxes containing 25.

" 2. Improved U. S. Primers, adapted to all Paper and Brass Shot Shells, Military and Sporting Cartridges.	2 00	1,000	25,000
Packed in one-quarter boxes.			

Paper Shot Shells.

Paper Shot Shell, cut open, showing Improved Conical Base.

After long and careful experiments, with a view to giving the powder charge a free and instantaneous ignition from the Primer, this Company has perfected a new paper shot shell with conical base and extra strong and quick Primer, that is especially adapted for E. C., Schultze, and American Wood Powders ; also, all Black Powders. The fulminating powder in these Primers is the result of our experiments for months, and is only made by this Company, and when ignited is forced up into the body of powder instantly and thoroughly burns the full charge, giving quick and even discharge and more penetration to shot.

Paper Shot Shell, cut open, showing Old Style Base.
